|---|----------------|---|----------------|
| <b>Foreword</b>   | 1              |   |                |
| <b>Preface</b>  | 2              |   |                |
| <b>Notes of Conservator of Forests, Monitoring Circle, WB</b>   | 3              |   |                |
| <b>Acknowledgement</b>  | 4              |   |                |
| <b>Abbreviations</b>  | 5              |   |                |
| <b>Calendar of works</b>  | 6              |   |                |
| <b>Introduction</b>   | 7              |   |                |
|   |                |   |                |
| <b>Methodology</b>  | 7-8            | Pre-survey works                                      | 8              |
|   |                | Field works   | 8              |
|   |                | Calculation of survival percentage                    | 8              |
|   |                | Category wise Survival % of plantations               | 8              |
|   |                |   |                |
| <b>New monitoring methodology</b>                               | 9-10           | Scoring index for 1 <sup>st</sup> year old plantation | 10             |
|   |                | Scoring index for 3 <sup>rd</sup> year old plantation | 10             |
|   |                | Scoring index for 5 <sup>th</sup> year old plantation | 10             |
|   |                | Table for colour code                                 | 10             |
| <b>Area statement for 2016 plantation- South Bengal</b>         | 11             |   |                |
|   |                |   |                |
| <b>Division wise weighted performance score</b>                 | 12             | 1 <sup>st</sup> year plantation, year-2016            |                |
|   |                |   |                |
| <b>Division wise weighted survival %</b>                        | 13-14          | 3 <sup>rd</sup> year plantation, year- 2014           | 13             |
|   |                | 5 <sup>th</sup> year plantation, year- 2012           | 14             |
|   |                |   |                |
| <b>Scheme wise representation- Scheme Quick growing species</b> | 15-17          | 1 <sup>st</sup> year, (2016)                          | 15             |
|   |                | 3 <sup>rd</sup> year,(2014)                           | 16             |
|   |                | 5 <sup>th</sup> year, (2012)                          | 17             |
|   |                |   |                |
| <b>Scheme wise representation- Scheme- FT-Sal</b>               | 18-20          | 1 <sup>st</sup> year, (2016)                          | 18             |
|   |                | 3 <sup>rd</sup> year,(2014)                           | 19             |
|   |                | 5 <sup>th</sup> year, (2012)                          | 20             |
|   |                |   |                |
| <b>Scheme wise representation- Scheme- Bamboo</b>               | 21-22          | 1 <sup>st</sup> year, (2016)                          | 21             |
|   |                | 3 <sup>rd</sup> year,(2014)                           | 22             |
|   |                | 5 <sup>th</sup> year, (2012)                          | 22             |
|   |                |   |                |
| <b>Scheme wise representation- Scheme- Strip plantation</b>     | 23-24          | 1 <sup>st</sup> year, (2016)                          | 23             |
|   |                | 3 <sup>rd</sup> year,(2014)                           | 24             |
|   |                | 5 <sup>th</sup> year, (2012)                          | 24             |

| <b>Chapter</b>   | <b>Page no</b> | <b>Detail in Chapter</b>  | <b>Page no</b> |
|--|----------------|---|----------------|
| <b>Scheme wise representation- Scheme- Conservation &amp; management of mangrove</b> | 25             | 1 <sup>st</sup> year, (2016)                                      | 25             |
|  |                | 3 <sup>rd</sup> year,(2014)                                       | 25             |
|  |                | 5 <sup>th</sup> year, (2012)                                      | 25             |
| <b>Scheme wise representation Scheme- Coastal shelter belt</b>                       | 26             | 1 <sup>st</sup> year, (2016)                                      | 26             |
|  |                | 3 <sup>rd</sup> year,(2014)                                       | 26             |
|  |                | 5 <sup>th</sup> year, (2012)                                      | 26             |
| <b>Scheme wise representation Scheme- Protective afforestation</b>                   | 27             | 3 <sup>rd</sup> year,(2014)                                       | 27             |
|  |                | 5 <sup>th</sup> year, (2012)                                      | 27             |
| <b>Scheme wise representation Scheme- Medicinal Plant</b>                            | 27             | 5 <sup>th</sup> year, (2012)                                      | 27             |
| <b>Scheme wise, highest/lowest WSP</b>   | 28-32          | 1 <sup>st</sup> year, (2016)                                      | 28-29          |
|  |                | 3 <sup>rd</sup> year,(2014)                                       | 30             |
|  |                | 5 <sup>th</sup> year, (2012)                                      | 31-32          |
| <b>Change of WSP</b>   | 33-34          | (WSP in 1st year and 3rd year of 2014 plantation)                 | 33             |
|  |                | (WSP in 1st year, 3rd year & 5th year of 2012 plantation)         | 34             |
| <b>Overall WSP<br/>1st year, 3rd year, 5th year plantation</b>                       | 35             |   |                |
| <b>Detail monitoring report of Central circle</b>                                    | 36-45          | 1st year (2016 Plantation)- Division wise performance             | 37             |
|  |                | 3 <sup>rd</sup> year (2014 Plantation)- Division wise performance | 38             |
|  |                | 5 <sup>th</sup> year (2012 Plantation)- Division wise performance | 38             |
|  |                | 1st year (2016 plantation)- Range wise performance                | 39             |
|  |                | 3rd year (2014 plantation)- Range wise performance                | 40             |
|  |                | 5th year (2012 plantation)- Range wise performance                | 41             |
|  |                | 1st year (2016 plantation) - Highest/Lowest WSP                   | 42             |
|  |                | 3rd year (2014 plantation) - Highest/Lowest WSP                   | 42             |
|  |                | 5th year (2014 plantation) - Highest/Lowest WSP                   | 43             |

## Foreword

Monitoring is an essential tool to ascertain the relative success of any plantation since every plantation is a long term investment in financial and environmental terms. Forest directorate has its own monitoring wing equipped and trained for the purpose, which records information on survival, height etc. Generally a sampling intensity varies from 7.5% to 5% is adopted for the purpose.

The plantation created under State Plan during the year 2016-17 spread over 4775.74 ha. (1<sup>st</sup> year monitoring) in Bamboo (310 ha.), CMM (541.72 ha.), CSB (60 ha.), FT-Sal (316.5 ha.), QGS (3152.52 ha.) and Strip Plantation (395 ha.) schemes. Plantations were raised in different forest Divisions of South West Bengal. Over all, plantations have shown higher level of success with a weighted survival percentage of 93%.

The plantation created under State Plan during the year 2014-15 spread over 8159 ha. (3<sup>rd</sup> Year monitoring) in Bamboo (580 ha.), CMM (430 ha.), CSB (117 ha.), FT-Sal (615 ha.), Prot Afforestation (60 ha.), QGS (5859 ha.) and Strip Plantation (498 ha.) schemes. Plantations were raised in different forest Divisions of South West Bengal. Over all, plantations have shown higher level of success with a weighted survival percentage of 81%.

The plantation created under State Plan during the year 2012-13 spread over 5939.94 ha. (5<sup>th</sup> Year Monitoring) in Bamboo (150 ha.), CMM (520 ha.), CSB (150 ha.), FT-Sal (675.06 ha.), Medicinal Plantation (18 ha.), Prot Afforestation (60 ha.), QGS (3922.88 ha.) and Strip Plantation (444 ha.) schemes. Plantations were raised in different forest Divisions of South West Bengal. Over all, plantations have shown higher level of success with a weighted survival percentage of 58%.

I congratulate the participating Divisions led by the respective CCFs and DFOs for raising truly good plantations. I extend my sincere appreciation to the Monitoring team, led by Sri Apurba Sen, IFS, Divisional Forest Officer, Monitoring (South) Division who had painstakingly undertaken the exercise against all the odds with active encouragement from his senior officers from this wing.

Every Monitoring activity gives certain level of experience and ideas which would help us improvise the process further.

Principal Chief Conservator of Forests,  
Research, Monitoring and Development, WB.

## Preface

Periodic survey and monitoring of plantations is an indispensable tool for forest management and policy formulation. It also helps policy makers, field executives and Government as a whole in ascertaining plantations growth statistics, accountability of stack holders and to judge the effectiveness of the plantation management practices. The concept of new monitoring methodology undertaken by the Monitoring & Evaluation wing of Forest Directorate consists of Conformity, Execution and Performance parameters which are prerequisites for observation and recording the status of survival percentage, height attained, vigor and general health of well established plantations. In case of fifth year old plantations breast height girth is also be taken in to consideration.

Monitoring (South) Division has taken up the works of monitoring of 2016 i.e. 1<sup>st</sup> year old plantations raised under SPAP project in 19 Forest Divisions of South Bengal during the year 2016-17. This reflects the level of protection and maintenance received by the forest plantation from the concerned forest staff backed by benevolent Joint Forest Management Committee.

The presentation of the Draft Survey Monitoring Report of South West Bengal 2016-17 was done on 29<sup>th</sup> November, 2017 at Aranya Bhawan, Kolkata. Some of the suggestions received during the presentation are included in this report.

I would like to thank Sri Apurba Sen, IFS, Divisional Forest Officer, Monitoring (South) Division along with their entire field and office staff for doing their job painstakingly. My thanks are also to Sri M.C. Biswas, IFS, Conservator of Forests, Monitoring Circle, West Bengal for his timely suggestions and guidance to officers and staff.

(M.R. Bhatta, IFS)  
Chief Conservator of Forests,  
Monitoring and Evaluation, WB.

## Note of Conservator of Forests,

Monitoring Circle, West Bengal.

Monitoring of plantations created by the forest Division is a needful mechanism to assess the quality of plantations. Survey Monitoring Reports 2016-17 in respect of plantations raised in South Bengal is now being published in this volume. This report deals with plantations raised with funds from the Forest Department during the years 2012, 2014 and 2016. Field work for Survey monitoring of those plantations were carried during July'2016 to March'2017.

As usual Draft copies of Monitoring Reports 2016-17 pertaining to South Bengal was circulated to the concerned Divisions. Individual data sheet was also sent to all concerned Divisions for getting feedback from them. Comments as received from some of the officers have been suitably incorporated in the present report. Efforts have been made to reconcile the data and observations of officers.

In addition to these some of the suggestions received during the presentation of this monitoring report 2016-17 held at Aranya Bhawan, Kolkata on 29<sup>th</sup> November, 2017 have also been incorporated in this report. I appreciate the effort of Divisional Forest Officer, Monitoring (South) Division in bringing out this report in time.

I extend my personal gratitude to all my colleagues for their advice and co-operation.

(M.C. Biswas, IFS)

Conservator of Forests,  
Monitoring Circle, WB.

## Acknowledgment

The major function of Divisional Forest Officer and his team is to perform the following works with regards to the publication of this report-

1. Collection of preliminary data on plantation viz. location, scheme etc. of from Divisional Forest Officer of different division of South Bengal.
2. Verify the data in field by collecting Regeneration Map and FORM-1.
3. Conduct monitoring in the field through Range Officer & staff.
4. Compilation of the data after field work.
5. Sending the compiled data to the concerned DFOs to get their comment and also for if there is any correction.
6. Uploading the data after including the correction in the web site – [https://wbfbcp.org/stateplan/dash\\_board.php](https://wbfbcp.org/stateplan/dash_board.php)
7. Preparation of the draft report and submit the same to the Conservator of Forests, Monitoring Circle, West Bengal.
8. After inclusion the corrections and suggestions of the Conservator of Forests, Monitoring Circle, West Bengal.
9. Finally publish the report.

In the above process I sincerely acknowledge the suggestion and guidance of Principal Chief Conservator of Forests, Research, Monitoring and Development, West Bengal and Addl. Principal Chief Conservator of Forests, Research & Monitoring, West Bengal.

I acknowledge the suggestion and continuous guidance of Chief Conservator of Forests, Monitoring and Evaluation, West Bengal and Conservator of Forests, Monitoring Circle, West Bengal.

I acknowledge the help and cooperation of Chief Conservator of Forests, Central Circle, West Bengal, Chief Conservator of Forests, Western Circle, West Bengal, Chief Conservator of Forests, South East Circle, West Bengal, Chief Conservator of Forests, South West Circle, West Bengal, Conservator of Forests, Parks & Gardens Circle, West Bengal and Joint Director, Sundarban Biosphere Reserve.

I am also thankful to the DFOs and their team at South Bengal.

I am also very thankful to Asstt. Divisional Forest Officer, Monitoring (South) Division for his very sincere effort and helping me in field work and in compilation of the report.

I am thankful to all the Range Officers and their staff who sincerely completed the field work within time frame in spite of several hindrances.

My special thanks goes to Accountant cum Cashier, Monitoring (South) Division for arranging the designing and typing of this report and bearing me for carrying my order even in odd time.

Abul Hasan  
Divisional Forest Officer,  
Monitoring (South) Division.

| 30th Nov  | Final State Monitoring Report (1 volume) Publication and Distribution   | CF/Monitoring   |

## Introduction

Monitoring is an ongoing activity which analyses the progress of planned activity. Evaluation assesses the efficiency, impact relevance and sustainability of the project's action. Monitoring and evaluation also helps to improve the planning of a project. Monitoring and evaluation also signifies not only the quality of plantation but also to assess the parameters followed in the prescription of the plantation.

The main objective of the monitoring are

- To monitor physically and document the status of plantations under State Plan by means of random sampling method.
- To evaluate the some activities of steps of creation of plantation, survival & health of plantations emphasizing on the parameter of height for 1st and 3rd year plantation & height and GBH for 5th year plantation.

During the Financial Year 2016-17, Monitoring (South) Division has executed the Survey Monitoring works for the plantations as stated below:

| Plantation   | Year of Monitoring | Total Area in Ha. | Area monitored in Ha. |
|--------------|--------------------|-------------------|-----------------------|
| 2016         | 1st                | 4775.74           | 4775.74               |
| 2014         | 3rd                | 8159.00           | 8159.00               |
| 2012         | 5th                | 5939.94           | 5939.94               |
| <b>Total</b> |                    | <b>18874.68</b>   | <b>18874.68</b>       |

## Methodology

The analysis has been carried out and result achieved on the basis of data recorded in the prescribed Survey Monitoring data sheets.

The individual plantation data in a compiled form was circulated to the concerned Divisional Forest Officer and their respective Conservator of Forests/Chief Conservator of Forests in advance for checking of data & comments. This also helps them to replace the casualties & take other remedial measures targeted towards improvement of quality of plantations. The feedback received has been considered in the compilation of draft monitoring report.

Three major parameters viz. survival percentage, height and girth at breast height (only for 5<sup>th</sup> year plantation) of seedling are taken into consideration for the process.

The other parameters viz. maintenance of plantation journal, Sources of seed for raising nursery, time schedule of activity of creation stage & frequency of field visit of the supervising authority etc are also considered in performance scoring of the plantation, the detail of which is given in the new monitoring methodology.

The above parameters are measured in the field in individual patch of the plantation by random sampling method. The procedure is given below.

For the purpose of execution of survey & monitoring works the Statistical random sampling method is in practice.

The sampling intensity and size of sample plot for different ages of plantation is given below-

| Sl. No. | Age of plantation    | Sampling intensity | Size of sample plot | Data recording   |
|---------|----------------------|--------------------|---------------------|--|
| 1)      | 1 <sup>st</sup> year | 7.5% of the area   | 50mtX50mt.          | No of seedling species wise & height class wise.                           |
| 2)      | 3 <sup>rd</sup> year | 5% of the area     | 50mtX50mt.          | No of seedling species wise & height class wise.                           |
| 3)      | 5 <sup>th</sup> year | 5% of the area     | 50mtX50mt.          | No of seedling species wise, height class wise & girth at breast height. . |

## Pre-survey Works

1. Copies of regeneration maps along with plantation journals are collected from the respective DFOs.
2. Location, area, spacing of planting scheme etc. are also recorded as check list.
3. A grid line as per scale is laid over the map with quadrates of 50m x 50m & each grid is serially numbered.
4. Numbers of Sample plots (grids) are chosen randomly using the statistical random number table.

## Field works

1. The selected sample plots are identified in the field.
2. Boundary corners are clearly marked with raised earthen mound topped with painted peg and geo-location is recorded.
3. Total enumeration is carried out species wise and in respect of height class intervals and also girth at breast height for the 5<sup>th</sup> year plantation.
4. The area of plantation is checked in the field by traversing with GPS.
5. At the time of Survey & Monitoring, the staff of respective range remains present & put their initials on the data sheets as the sign of authentication.

## Calculation of Survival percentage

As per approved spacing, total number of seedlings that should be present in those plots is calculated. Survival percentage is found out as the ratio of actual number of seedlings to the prescribed number.

## Category wise Survival % of plantations

According to the survival Percentage the plantations are classified as follows-

| Year of plantation | Category A       | Category B    | Category C     | Category D |
|--------------------|------------------|---------------|----------------|------------|
| 1st year           | SP : 90% & above | SP : 89 – 75% | SP : 74 – 50 % | SP : < 50% |
| 3rd year           | SP : 75% & above | SP : 74 – 60% | SP : 59 – 40 % | SP : < 40% |
| 5th year           | SP : 50% & above | SP : 49 – 40% | SP : 39 – 30 % | SP : < 30% |

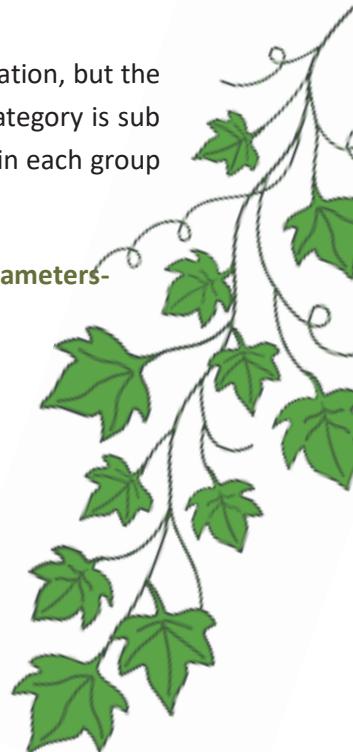

## New Monitoring Methodology

In the earlier method of plantation monitoring emphasis was given only on the weighted survival percentage for assessment of plantation quality. Although the data on height and girth at breast height were recorded but little use were made of those data in analysis of the quality of the plantation. The present adopted method of plantation monitoring emphasizes on the different parameters which are prerequisites for raising a good quality plantation. Ten such parameters have been identified. These parameters have been broadly classified in to following three categories.

1. Conformity to the existing rules, provisions and guidelines.
2. Execution of Plantation works in the field.
3. Performance of the plantation.

Each category has been assigned a score which varies with the age of the plantation, but the total score is kept 100 for all age category of the plantation. The total score of each category is subdivided among the parameters grouped under each category. The detail of parameter in each group is given below-

- **Conformity to the existing rules, provisions and guidelines consists of four parameters-**
  1. Legal status of land.
  2. Source of seed & status of nursery.
  3. Maintenance of plantation journal, regeneration plan.
  4. Planting pattern.
- **Execution of Plantation works in the field consists of four parameters-**
  1. Site quality & choice of species.
  2. Mechanism to protect plantation.
  3. Timely completion of prescribed plantation activities.
  4. Inspection intensity by supervising officers.
- **Performance of the plantation consists of two parameters-**
  1. Average survival percentage of seedling under different schemes during 1st, 3rd, 5th year.
  2. Reflection of general health of plantation by average height of seedlings under different scheme of 1<sup>st</sup>, 3<sup>rd</sup> & 5<sup>th</sup> year of plantation. For the 5<sup>th</sup> year old plantation another growth parameter which is girth at breast height (GBH) is recorded as a measure of performance.

Each parameter is assigned a maximum score which diminishes with the gradual non achievement of the definite parameters and reflected in score. The category and parameters have been standardized separately for 1<sup>st</sup>, 3<sup>rd</sup> & 5<sup>th</sup> year old plantation with year (age) specific assigned score.

The detail of score for each category is given below-

### Scoring index for 1<sup>st</sup> year old plantation

| Broad category   | Detail of parameters.  | Score      |
|--|--|------------|
| Conformity to the existing rules, provisions and guidelines. | Legal status of the land.                                      | 3          |
|  | Source of seed and status of nursery.                          | 3          |
|  | Maintenance of plantation journal along with regeneration map. | 3          |
|  | Planting pattern.  | 3          |
| Execution of Plantation works in the field.                  | Site quality & choice of species.                              | 5          |
|  | Mechanism to protect plantation.                               | 5          |
|  | Timely completion of prescribed plantation activities.         | 5          |
|  | Inspection intensity by supervising officers.                  | 5          |
| Performance of the plantation.                               | Average survival percentage                                    | 51         |
|  | General health of plantation                                   | 17         |
| <b>Total</b>   |  | <b>100</b> |

### Scoring index for 3rd year old plantation

| Sl. No.      | Detail of parameters.   | Score      |
|--------------|---|------------|
| 1            | Maintenance of plantation journal along with regeneration map | 5          |
| 2            | Mechanism to protect plantation                               | 5          |
| 3            | Infilling with big size seedling                              | 10         |
| 4            | Timely completion of prescribed plantation activity           | 5          |
| 5            | Inspection intensity by supervising officers                  | 5          |
| 6            | Average Survival Percentage                                   | 51         |
| 7            | General health of the seedling (Height)                       | 19         |
| <b>Total</b> |   | <b>100</b> |

### Scoring index for 5th year old plantation

| Sl. No.      | Detail of parameters.   | Score      |
|--------------|---|------------|
| 1            | Maintenance of plantation journal along with regeneration map | 3          |
| 2            | Mechanism to protect plantation                               | 5          |
| 3            | Inspection intensity by supervising officers                  | 5          |
| 4            | Average Survival Percentage                                   | 56         |
| 5            | General health of the seedling (Height)                       | 21         |
| 6            | Average GBH of seedling                                       | 10         |
| <b>Total</b> |   | <b>100</b> |

### Table for colour code-

| Grade     | Score   | Category | Color code |
|-----------|---------|----------|------------|
| Excellent | >85     | A        |            |
| Very Good | 71 - 85 | B        |            |
| Good      | 46 - 70 | C        |            |
| Average   | 31-45   | D        |            |
| Poor      | <30     | E        |            |

Table-1

### Scheme wise area monitored

### Abstract

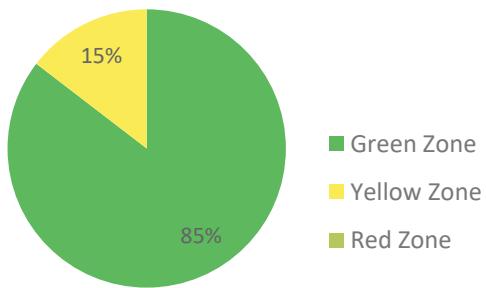

- The total plantation area for three years (2016, 2014 & 2012) to be monitored was 18874.68 ha. raised under 8 schemes of which QGS covers total 12934.40 ha. which is 68.53% of the total plantation raised in 3 years.
- Other schemes like Bamboo, CMM, FT-Sal, CSB, Protective Afforestation, Medicinal Plant & Strip Plantation covers total 5940.28 ha. which is 31.47% of the total plantation raised in 3 years.

## Division wise weighted performance score (1st Year Plantation, year-2016)

| Division / Scheme | Area in Ha. |           |              |           |           |           |            |           |               |           |             |           | Division wise WSP | Division wise WPS |
|-------------------|-------------|-----------|--------------|-----------|-----------|-----------|------------|-----------|---------------|-----------|-------------|-----------|-------------------|-------------------|
|                   | Bamboo      |           | CMM          |           | CSB       |           | FT-Sal     |           | Q.G.S.        |           | Strip Pltn. |           |                   |                   |

Table- 2.1

### Category of Plantation Based on Performance Score

### Abstract

- The quantum of plantation comes under green zone is 85% that means the plantations having performance scored more than 71.
- 15% quantum of plantation is in yellow zone that means the plantations scored 46-70.
- No plantation s in red zone that is alarming zone.

Table -7.1.1

### Scheme wise area share

### Abstract

- Bamboo scheme taken up by all the 3 division under this circle. The total area covered under this scheme of 180 ha. The WSP of Bankura (N), Bankura (S) and Panchet Division is 88, 69 and 91 respectively.
- Under the scheme FT-Sal, only Bankura (S) division raised 50 ha. with WSP 96.
- QGS as most preferred scheme, taken up by all 3 division under this circle. The total area covered under this scheme is 1268 ha. The WSP is more than 95 for all 3 division.
- The performance of Panchet division is best , the division maintained overall WSP 97.
- The overall WSP of Bankura (N) & (S) is 96 and 93 respectively.

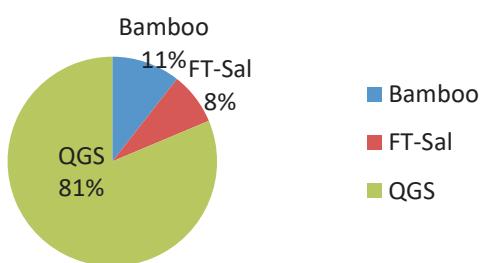

### 3rd year (2014 Plantation)- Division wise performance

Area in Ha. &amp; height in cm.

Table -7.1.2

### Scheme wise area share

### Abstract

- FT-Sal scheme was taken up by all 3 divisions over 225 ha. and maintained excellent performance with WSP 87 and above.
- QGS as usual being preferred scheme raised over 2266 ha. with overall WSP 88.
- Total plantation area monitored in this circle was 2786 ha. with overall WSP 84 and with a good height of 337 cm.

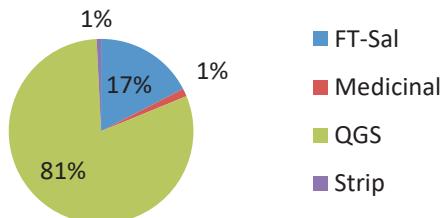

### 5th year (2012 Plantation)- Division wise performance

Table-7.6

### Circle Performance (PS)

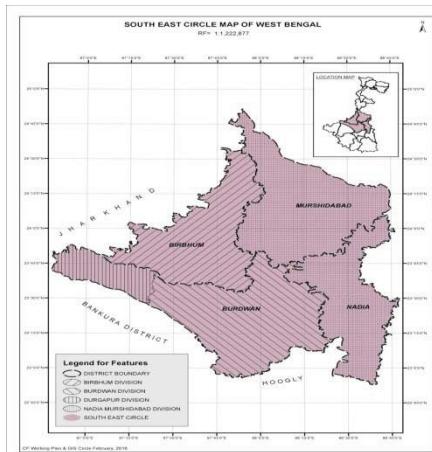

### Abstract

- In this circle out of 1198 ha. 1134 hec of plantation comes under green zone, and 432 ha. of plantation scored more than 85.
- 266 ha. which is 17.76% of total plantation comes under yellow zone.
- 98 ha. of plantation in this circle comes under red zone.
- 57.31% of plantation of Panchet Division scored more than 85.

- 88.06% of plantation of Panchet Division comes under green zone.

Table -8.1.1

Scheme wise area share

## Abstract

- Strip plantation scheme taken up by 2 divisions under this circle. The total area covered under this scheme of 50 ha. The WSP of Birbhum and Burdwan division is 96.
- Under the scheme FT-Sal, only Birbhum division raised 10 ha. with WSP 98.
- QGS as most preferred scheme, taken up by all 4 division under this circle. The total area covered under this scheme is 320.02 ha. The WSP is more than 94 for all 4 divisions.
- The performance of Durgapur division maintained overall WSP 99.
- The overall WSP of Birbhum, Burdwan and Nadia & Murshidabad are 98, 96 and 97 respectively.

Table -8.1.2

#### Scheme wise area share

#### Abstract

- FT-Sal scheme was taken up by 2 divisions over 65 ha. and maintained excellent performance with WSP 75 and above.
- QGS as usual being preferred scheme raised over 650 ha. with overall WSP 76.
- Under the scheme Strip pltn., only Burdwan division raised 72 ha. with WSP 78.
- Total plantation area monitored in this circle was 787 ha. with overall WSP 76 and with a good height of 270 cm.

Table -8.1.3

#### Scheme wise area share

#### Abstract

- FT-Sal scheme was taken up by 2 divisions over 50 ha. and maintained with over all WSP 57.
- QGS as once again regarded as preferred raised over 575 ha. with overall WSP 59.
- Under the scheme Strip pltn., only Burdwan division raised 24 ha. with WSP 60.
- Total plantation area monitored in this circle was 649 ha. with overall WSP 59 and with height of 470 cm.

Table-8.6

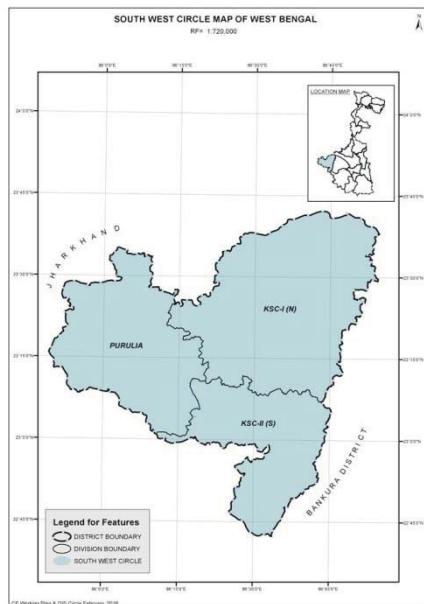

### Circle Performance (PS)

### Abstract

- In this circle out of 380.02 ha. 290.02 hec of plantation comes under green zone, and 47 ha. of plantation scored more than 85.
- 90 ha. which is 23.68% of total plantation comes under yellow zone.
- No plantation in this circle comes under red zone.
- All the plantation of Nadia Murshidabad Division came under green zone.
- 12.37% of plantation of this circle scored more than 85.

Table -9.1.1

### Scheme wise area share

### Abstract

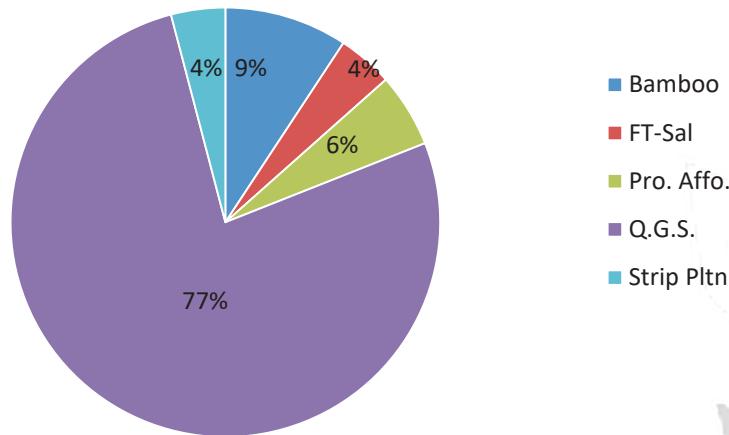

- FT-Sal scheme taken up by 2 divisions under this circle. The total area covered under this scheme of 75 ha. The WSP of Kangsabati South and Purulia division are 97 and 99 respectively.
- Under the scheme Strip Pltn., only Purulia Extension Forestry division raised 60 ha. with WSP 97 and height 71 cm.
- QGS as most preferred scheme, taken up by 3 divisions under this circle. The total area covered under this scheme is 420 ha. The WSP is more than 97 for all 3 divisions.
- Bamboo scheme, taken up by 3 divisions under this circle. The total area covered under this scheme is 75 ha. The WSP is more than 93 for all 3 divisions.
- The overall WSP for all 4 divisions in this circle is 97 and more.

Table -9.1.2

### Scheme wise area share

### Abstract

- FT-Sal scheme was taken up by 2 divisions i.e. KNG(N) and KNG(S) over 45 ha. and maintained excellent performance with WSP 85 and above.
- QGS as usual being preferred scheme raised over 830 ha. with overall WSP 85.
- Under the scheme Strip pltn., only EFD division raised 44 ha. with WSP 58
- Total plantation area monitored in this circle was 1079 ha. with overall WSP 76 and with a height of 198 cm.

## 5th year (2012 Plantation)- Division wise performance

Table -9.1.3

### Scheme wise area share

#### Abstract

- FT-Sal scheme was taken up by 3 divisions over 100.06 ha. and maintained with over all WSP 40.
- QGS as once again regarded as preferred raised over 807.88 ha. with overall WSP 56.
- Under the scheme Strip pltn., only EFD, Purulia division raised 20 ha. with WSP 39 and height 149 cm.
- Total plantation area monitored in this circle was 987.94 ha. with overall WSP 53 and with height of 288 cm.

Table-9.6

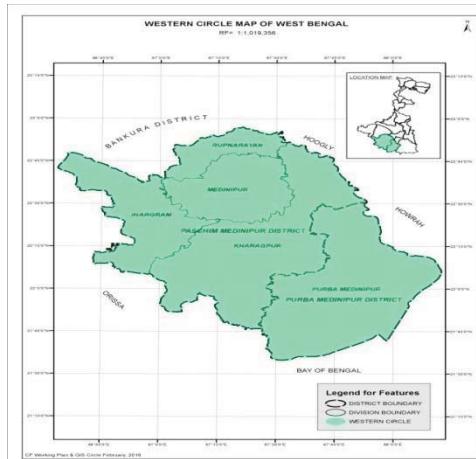

### Circle Performance (PS)

### Abstract

- In this circle out of 630 ha. 557 ha. of plantation comes under green zone, and 173 ha. of plantation scored more than 85.
- 73 ha. which is 11.59% of total plantation comes under yellow zone.
- No plantation in this circle comes under red zone.
- All the plantation of Extension Forestry Division came under green zone.
- 36.92% of plantation of Purulia scored more than 85.

Table -10.1.1

### Abstract

#### Scheme wise area share

- Under the scheme Bamboo, only Rupnarayan division raised 40 ha. with WSP 80.
- CMM and CSB scheme were taken up by PMID division, raised 101.7 ha. and 60 ha. respectively with WSP 79 and 97.
- FT-Sal scheme was taken up by 4 divisions i.e. Jhargram, Kharagpur, Midnapur and Rupnarayan over 177 ha. and maintained excellent performance with over all WSP 95.
- QGS as usual being preferred scheme raised over 1165 ha. with overall WSP 96.
- Total plantation area monitored in this circle was 1657.72 ha. with overall WSP 94 and with a height of 78 cm.

Table -10.1.2

### Scheme wise area share

### Abstract

- Under the scheme Bamboo, 3 division i.e. Jhargram, Midnapur and Rupnarayan division raised 185 ha. with overall WSP 50.
- CMM and CSB scheme were taken up only PMID division, raised 110 ha. and 117 ha. respectively with WSP 62 and 81.
- FT-Sal scheme was taken up by 4 divisions i.e. Jhargram, Kharagpur, Midnapur and Rupnarayan over 280 ha. and maintained excellent performance with over all WSP 77.
- QGS as usual being preferred scheme raised over 2113 ha. with overall WSP 87.
- Under the scheme Strip pltn. was taken up by 2 divisions, i.e. Kharagpur, Purba Midnapur division raised 122 ha. with overall WSP 87.
- Total plantation area monitored in this circle was 2927 ha. with overall WSP 82 and with a height of 283 cm.

### Scheme wise area share

### Abstract

- Under the scheme Bamboo, 3 division i.e. Jhargram, Kharagpur and Midnapur division raised 150 ha. with WSP 35.
- CMM and CSB scheme were taken up only PMID division, raised 80 ha. and 150 ha. respectively with WSP 58 and 49.
- FT-Sal scheme was taken up by 4 divisions i.e. Jhargram, Kharagpur, Midnapur and Rupnarayan over 300 ha. and maintained with over all WSP 61.
- QGS as usual being preferred scheme raised over 1500 ha. with overall WSP 57.
- Under the scheme Strip pltn. was taken up by 2 divisions, i.e. Kharagpur, Purba Midnapur division raised 90 ha. with WSP 83.
- Total plantation area monitored in this circle was 2270 ha. with overall WSP 57 and with a height of 412 cm.

Table-10.6

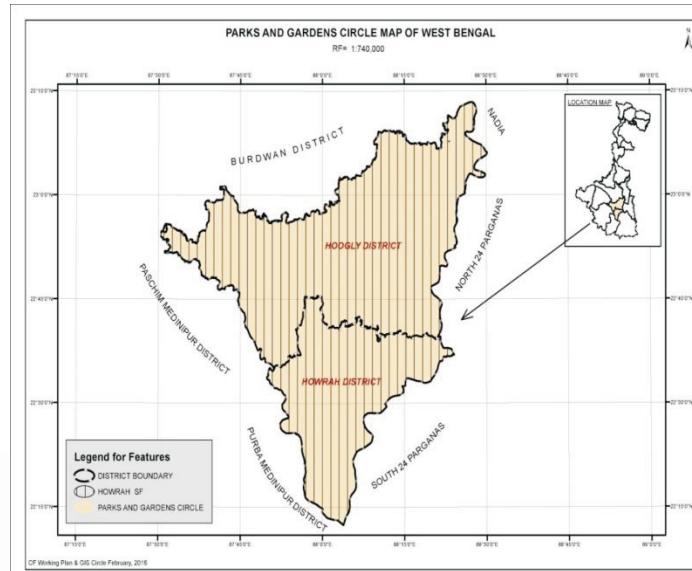

### Circle Performance (PS)

### Abstract

- In this circle out of 1657.72 ha. 1110.5 hec of plantation comes under green zone, and 219.5 ha. of plantation scored more than 85.
- 363.72 ha. which is 21.94% of total plantation comes under yellow zone.
- 183.5 plantation in this circle comes under red zone.
- 9.92% of Purba Midnapur Division scored below 30.
- 38.98% of plantation of Kharagpur scored more than 85.

### Circle Performance (PS)

### Abstract

- In this circle out of 560 ha. of plantation 272.5 ha. plantation i.e. 46.19% came under yellow zone.
- There is no plantation in green zone.
- All the plantation of 24-Parganas (N) division comes under red zone.

Table- 13

### Circle Performance (PS)

### Abstract

- Total 4775.74 hectare of plantation is raised during the year 2016-17. Out of this 3121.52 ha which is 65.36% is under green zone i.e. good quality of plantation.
- Only 12.54% of plantation is in red zone.
- 1055.22 ha of plantation are in yellow zone which is 22.10% of the total plantation raised.
- In South East, South West and Parks & Garden circle no plantation is in Red Zone.
